

Machine Learning Engineer (m/f)

We are Whow Games

In the heart of Hamburg City, your new job is waiting for you - including startup feeling. Together with 50 colleagues, you work to bring the glamour and entertainment of Las Vegas to Europe - with our successful Social Casino on Jackpot.de. From slot machines to table games, our players can experience the entire entertainment experience of the largest casinos in the world for free on their smartphone, tablet or PC

Who are we looking for?

Are you an experienced **Machine Learning Engineer (m/f)** and do you enjoy taking data and generating economical benefits from it? Then we're looking for you for our Hamburg-based gaming factory - and admittedly in a full-time capacity and as soon as possible.

Your responsibilities:

- You work on challenging IT projects at the forefront of technological development
- Creation of models and data analysis (predictive and descriptive analytics)
- Establishment of exciting cases of application such as e.g. forecasting, recommendation, clustering, classification, fraud detection
- Explorative data analysis for defining analytical strategies
- Performance-driven selection of machine learning algorithms
- Application of the deep learning procedure
- Data management and preparation of poly-structured data with SQL databases
- Conducting data science projects from analysis to roll out, i.e. "Data Science to Production"
- Application of an agile approach

What you bring:

- Successfully complete studies in the field of mathematics, physics, psychology, statistics, computer sciences, business administration or neurosciences
- Relevant professional experience in the field of data analysis and/or machine learning
- You've already been able to collect founded experience in data science or big data projects or in the software development
- You have profound statistical knowledge
- You ideally have experience in analyzing a B2C product
- Very good knowledge of R or Python and SQL
- Experience with data visualization and reporting software (i.e. Periscope, Tableau)
- Strong analytical and conceptual capabilities as well as a very strong general and technical comprehension skills
- Excellent knowledge of both written and spoken German and English
- Above-average standards of quality while working in an absolutely dependable und independent manner
- Capable of working in a team while featuring a competent and professional demeanor
- Experience in the online gaming industry would be an advantage

In addition to start-up flair and exciting tasks, we offer:

- Dynamic environment with flat hierarchies and quick decisions
- Flexible working hours and home office
- Regular company events
- Fruit, drinks and meal allowances
- Contribution to the HVV Profi Card
